PROFESSIONAL SUMMARY

Frontend Developer with 2.10+ years of experience in designing and developing scalable, responsive, and user-centric web and mobile applications using React.js, Angular, Next.js, React Native, TypeScript, and JavaScript. Experienced in building enterprise applications across Logistics, HRMS, CMS, Tour Booking, Crypto Trading, and Admin Management domains. Proficient in developing reusable UI components, integrating REST APIs and WebSocket, implementing authentication and role-based access control, managing application state with Redux and React Query, and delivering responsive, high-performance user interfaces. Adept at collaborating with cross-functional Agile teams to build maintainable, production-ready applications with clean, reusable, and scalable code.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript

Frameworks & Libraries: React.js, Angular, Next.js, React Native, Redux, ContextAPI, React Query (TanStack), RxJS, Axios

Styling & UI: HTML, CSS, SCSS, Tailwind CSS, Bootstrap, Material UI, Angular Material, Ant Design (AntD), PrimeNG

Testing: Jest, React Testing Library, Jasmine, Karma

Tools & Platforms: Git, GitHub, GitLab, VS Code, Postman, Swagger, Jira

Core Concepts: Responsive Web Design, Component-Based Architecture, Reusable Components, REST API Integration, WebSocket Integration, State Management (Redux, RxJS), Dynamic Routing, JWT Authentication, Role-Based Access Control, Cross-Browser Compatibility, Agile, Object-Oriented Programming (OOP)

WORK EXPERIENCE

VertexPlusTechnologies Limited

November 2025 – Present

Software Developer | Full-time | On-site

Jaipur, Rajasthan, India

XSwift – Logistics, Shipment & Fleet Management Platform:

- Developed frontend solutions for an enterprise logistics, shipment, and fleet management platform using Angular, TypeScript, Bootstrap, and SCSS.
- Implemented 18+ business-critical logistics modules supporting trip planning, route management, fleet operations, customer management, ePOD, reporting, dashboards, and transportation workflows.
- Integrated REST APIs to support shipment tracking, fleet operations, and end-to-end business workflows across multiple application modules.
- Delivered new business features, enhanced existing modules, and resolved production issues across enterprise logistics applications.
- Wrote unit test cases using Jasmine and Karma to validate business logic and maintain application quality

InfoAnts LLP

December 2024 – October 2025

Frontend Developer | Full-time | Remote

Noida, Uttar Pradesh, India

FireXch – Real-Time Crypto Trading & Betting Platform:

- Developed frontend modules for a real-time crypto trading and betting platform using React.js, TypeScript, and Tailwind CSS, implementing 15+ business-critical modules including user management, KYC verification, wallet management, betting operations, transactions, reports, notifications, and platform administration.
- Integrated WebSocket-based real-time communication for live betting activities, wallet transactions, odds updates, and market data, ensuring seamless real-time synchronization across the platform.
- Integrated REST APIs using React Query (TanStack Query) and Axios for efficient data fetching, caching, server-state management, testing, debugging, and application reliability.

Backpacker - Tour Booking CMS:

- Developed frontend modules for a multilingual travel booking platform using React.js, Next.js, TypeScript and Tailwind CSS.
- Implemented business modules for managing tours, destinations, travel packages, blogs, itineraries, and promotional content through a centralized administration portal.
- Performed frontend testing, debugging, and quality improvements by validating UI workflows, handling API integration issues, fixing defects, and ensuring cross-browser compatibility and application stability.

QGen - AI-based Question Generator:

- Developed a dynamic Content Management System (CMS) using Angular, TypeScript, and Tailwind CSS for an AI-powered educational platform.
- Designed and implemented CMS modules for managing question templates, subjects, chapters, topics, difficulty levels, and educational content.
- Integrated REST APIs to support end-to-end content management workflows across multiple CMS modules.

Timelabs HRMS – SaaS-Based Client HR Management Platform:

- Developed frontend modules for an enterprise SaaS-based HRMS platform using React.js and Angular, supporting employee lifecycle and workforce management workflows.
- Implemented 8+ business-critical HR modules covering onboarding, employee self-service (ESS), attendance, payroll, helpdesk, visitor management, and other HR operations.
- Integrated REST APIs to support end-to-end HR processes, real-time data synchronization, and business workflow automation across multiple application modules.
- Integrated WhatsApp chatbot functionality to automate HR operations, including attendance updates and leave request workflows.

Timelabs ESS Mobile Application – Employee Self-Service App:

- Developed a cross-platform Employee Self-Service (ESS) mobile application using React Native to enable employees to access HR services on Android and iOS platforms.
- Implemented 8+ employee-focused modules including attendance tracking, leave management, employee profile, notifications, holiday calendar, salary details, HR service requests, and self-service workflows.
- Integrated REST APIs for real-time data synchronization between the mobile application and HRMS backend services.
- Built reusable React Native components and responsive mobile interfaces to deliver a consistent user experience across multiple devices.
- Implemented mobile workflows to improve employee self-service capabilities and reduce dependency on manual HR processes.

Vizitrac Mobile Application – Visitor Management App:

- Developed a cross-platform visitor management mobile application using React Native for managing visitor registration and tracking workflows.
- Implemented 5+ visitor management modules including visitor registration, check-in/check-out, visitor details management, approval workflows, visitor tracking, and notification handling.
- Integrated REST APIs for seamless communication between the mobile application and enterprise visitor management systems.
- Developed reusable UI components and optimized mobile screens for better performance and usability across Android and iOS devices.
- Enhanced visitor management operations by providing a digital and efficient mobile-based workflow solution.

CTPL Console – Internal Enterprise Admin Dashboard:

- Developed an enterprise administration platform using React.js for managing clients, subscriptions, users, permissions, and platform configurations.
- Implemented 10+ administrative modules supporting client onboarding, subscription management, user administration, access management, and system configuration workflows.
- Integrated REST APIs to manage dynamic business data, client configurations, and platform operations through a centralized administration interface.
- Built reusable React components and responsive interfaces to deliver scalable and maintainable administration workflows.

EDUCATION

Suresh Gyan Vihar University

Master of Computer Applications (MCA)

January 2026 – Present

Jaipur, Rajasthan, India

Compucom Institute of Technology and Management

Bachelor of Computer Applications (BCA)

August 2021 – June 2024

Jaipur, Rajasthan, India

CERTIFICATIONS

- React - The Complete Guide (Incl. Next.js, Redux) – **Udemy, 2022**
- Angular - The Complete Guide – **Udemy, 2022**
- The Complete JavaScript Course: From Zero to Expert! - **Udemy, 2022**
- Advanced CSS and Sass: Flexbox, Grid, Animations and More! – **Udemy, 2022**

AWARDS & ACHIEVEMENTS

- **Emerging Talent Award:** Awarded at Cynosure Technology for excellence in frontend delivery and HRMS collaboration.
