PROFESSIONAL SUMMARY

Software Developer with 2.10+ years of professional experience building and delivering enterprise-grade web and mobile applications using Angular, React.js, Next.js, React Native, TypeScript, and JavaScript. Experienced in developing solutions across Logistics, Crypto Trading & Betting, Tour Booking, Education, HRMS, and Enterprise Administration domains. Strong hands-on expertise in REST API integration, WebSocket communication, reusable component architecture, responsive UI, state management, RxJS, Redux, React Query, authentication, authorization, and unit testing. Delivered and maintained 18+ logistics modules, 15+ betting platform modules, 10+ administration modules, 8+ HR/ESS modules, and 5+ visitor management modules across enterprise applications. Experienced in feature development, API-driven workflows, production issue resolution, debugging, cross-browser compatibility, Agile development, Git, and application maintenance, with a strong focus on building scalable, maintainable, and reliable frontend solutions.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript

Frameworks & Libraries: React.js, Angular, Next.js, React Native, Redux, Context API, React Query (TanStack), RxJS, Axios

Styling & UI: HTML, CSS, SCSS, Tailwind CSS, Bootstrap, Material UI, Angular Material, Ant Design (AntD), PrimeNG

Testing: Jest, React Testing Library, Jasmine, Karma

Tools & Platforms: Git, GitHub, GitLab, VS Code, Postman, Swagger, Jira

WORK EXPERIENCE

Software Developer — VertexPlus Technologies Limited, Jaipur

November 2025 – Present

XSwt – Logistics, Shipment & Fleet Management Platform:

- Developed enterprise logistics and fleet management applications using Angular, TypeScript, Bootstrap, and SCSS, implementing 18+ business modules across trips, workflows, routes, fleet, documents, customer management, dashboards, reports, ePOD, driver, and maintenance.
- Integrated REST APIs for shipment tracking, fleet operations, data management, and end-to-end transportation workflows.
- Delivered new features, enhanced existing modules, and resolved production defects across enterprise logistics applications.
- Created and maintained unit tests using Jasmine and Karma to validate business logic and application quality.

Frontend Developer — InfoAnts LLP, Noida

December 2024 – October 2025

FireXch – Real-Time Crypto Trading & Betting Platform:

- Developed 15+ business modules using React.js, TypeScript, and Tailwind CSS covering KYC, user management, wallets, betting, transactions, reports, notifications, and administration.
- Integrated REST APIs and WebSocket using React Query and Axios for real-time betting, wallet transactions, odds, market data, caching, and server-state management.

Backpacker - Tour Booking & Travel Management Platform:

- Engineered a multilingual tour booking and content management platform using React.js, Next.js, TypeScript, and Tailwind CSS, delivering reusable, scalable modules for tour management, destinations, travel packages, itineraries, blogs, and promotional content.
- Integrated REST APIs for dynamic data management and developed reusable components for API-driven workflows, responsive interfaces, frontend debugging, API issue resolution, and cross-browser compatibility.

QGen - AI-Based Education & Question Generation Platform:

- Developed an Angular-based education content management platform using Angular, TypeScript, and Tailwind CSS, implementing modules for question templates, subjects, chapters, topics, difficulty levels, and educational content.
- Integrated REST APIs and implemented dynamic data-driven workflows for content creation, management, validation, and retrieval across education platform modules.

Junior Frontend Developer — Cynosure Technology Private Limited, Jaipur

October 2023 – November 2024

Timelabs HRMS – SaaS-Based Client HR Management Platform:

- Developed 8+ enterprise HR modules using Angular and React.js, covering employee onboarding, Employee Self-Service, attendance, payroll, helpdesk, visitor management, and HR operations.
- Integrated REST APIs and WhatsApp Chatbot workflows for attendance updates, leave requests, employee data, and HR service operations.

Timelabs ESS Mobile Application – Employee Self-Service App:

- Developed a cross-platform React Native application with 8+ modules covering attendance, leave management, employee profile, notifications, holiday calendar, salary details, and HR service requests.
- Integrated REST APIs and built reusable React Native components for Android and iOS.

Vizitrac Mobile Application – Visitor Management App:

- Developed a cross-platform React Native visitor management application with 5+ modules covering visitor registration, check-in/check-out, approvals, visitor tracking, visitor details, and notifications.
- Integrated REST APIs and developed reusable mobile UI components to support digital visitor registration, approval, tracking, and notification workflows.

CTPL Console – Internal Enterprise Admin Dashboard:

- Developed a React.js enterprise admin platform with 10+ modules for clients, subscriptions, users, permissions, and access control.
- Integrated REST APIs and developed reusable React components for client, user, subscription, and platform configuration workflows.

EDUCATION

Master of Computer Applications (MCA) — Suresh Gyan Vihar University, Jaipur, Rajasthan | January 2026 – Present

Bachelor of Computer Applications (BCA) — Compucom Institute of Technology and Management, Jaipur, Rajasthan | August 2021 – July 2024
